Electric Actuators

Welcome to the seventh issue of Techtorque for 2007. Your feedback about our newsletters as well as your suggestions for any particular products or applications that you would like to read about is always welcome. With your input, we will do our best to provide you with informative and relevant reading matter. Please email your comments and requests to our Sales and Marketing Manager, Chris Hoare, at choare@acrodyne.com.au.

Acrodyne - The year in review

The past 12 months have been a huge success for Acrodyne and as an organisation moving forward many improvements have been put in place to achieve greater success in 2008.

- **New Building** - Acrodyne ownership of factory 7 to unify the Workshop and External Sales Engineers in factory 7 & 8 whilst Administration and Internal Sales will remain in factory 14.
- **New Software** - 2008 we will be switching over our computer system to SAP Business One, a leader in business systems software to help boost productivity.
- **Training** - This was another big initiative with 2 employees being sent to the USA for extensive training at Beck and Limatorque as well as many other management courses.
- **Exhibitions** - Continued involvement with WIOA water exhibitions, they proved to be an overwhelming success in 2007.

Other improvements

- **Limatorque MX** series upgrades including **Bluetooth**.
- PS Automation's **AMS** range.
- **IECex** certification added to the Smart range of **YTC** positioners.

New to Acrodyne

- **Trumbull** chain wheels.
- **Camtorc's** large capacity pneumatic damper control actuators.
- Development of a new and improved **website**.
- Improvement in our service division via our new service van and new technical staff.

This Editions Character First

Contentment

Realising that happiness doesn't depend on material conditions

- ... Help your team hit the target.
- ... Invest in family members and friends.
- ... Manage your resources.

5 Keys to Building Contentment:

- "Check your Wish-List" – consider what you need.
- "Enjoy what you have" – be grateful rather than compare to others.
- "Value Relationships" – each relationship brings unique possibilities.
- "Live within your means" – set priorities, address needs, invest wisely.
- "Give to others" – identify the needs of others and help out.

Why is Contentment important?

Cautiousness enables us to focus on those priorities that are most important to us.

For more information regarding Character First contact Philip Greenwood at People and Culture on (03) 9018 7971 or 0411 131 449 www.peopleandculture.com.au

That time of the year again....

The festive season is almost upon us for another year, and with exciting new products and services on the horizon, and the expansion of our offices into factory 7 the holidays will be a good chance to recharge the batteries. We would like this chance to wish all of our valued customers and families a safe festive season.

Below are the dates that Acrodyne will be closed during this time. A skeleton staff will be on hand to handle any urgent issues.

21st of December until the 7th of January

Next Issue: You will have to wait until next year... Seasons Greetings

- Truly Modular
- Corrosion Resistant
- Precise Click-Lock™ Calibration

Acrodyne's Service Capabilities

TECHTORQUE ARTICLE

Our Team

Our enthusiastic and dependable team has a broad range of capabilities including design and drafting, machining, electrical, instrumentation and control, on and off site repair work, field commissioning and industrial training. We are flexible in our approach, understanding today's business environment and are committed to providing exceptional customer service. With this Acrodyne can offer our customers a complete package of electronic or pneumatic valve actuation and control equipment.

Acrodyne's workshop is designed and equipped to offer our customers the quickest possible turn around to minimise downtime.

- Skilled Tradespeople
- 3 tonne forklift
- Torque test bench and testing
- 500 square metres of workshop
- Turning and machining facilities
- 1/2 tonne overhead crane
- Sand blaster
- 30 tonne press

Our skilled tradespeople with extensive knowledge and experience in electronics, machining and design have the resources to provide our customers with a complete actuation and control maintenance and overhaul service.

As a leading supplier in our field, we boast one of the largest ranges of actuation and control products in the market. Many of these products are stocked locally and can be provided as individual components through our vast reseller network or as custom designed assemblies providing creative solutions to end users many and varied application needs.
